Attempt : 1 Total Mark : 10 Marks Obtained : 10

Section 1: Coding

## 1. Problem Statement

As part of a programming assignment in a data structures course, students are required to create a program to construct a singly linked list by inserting elements at the beginning.

You are an evaluator of the course and guide the students to complete the task.

## **Input Format**

The first line of input consists of an integer N, which is the number of elements.

The second line consists of N space-separated integers.

**Output Format** 

The output prints the singly linked list elements, after inserting them at the beginning.
